• Do not disassemble the door unless necessary
Installation Instructions

Wall Mounted Mirror Cabinet

• Adjustable stainless steel buffer hinge

• Double layer adjustable tempered glass shelf

• Infrared sensor switch

• Bluetooth

• Aluminum alloy cabinet

• Double-sided copper-free silver mirror

Note: suit for Double doors LED mirror cabinet with Bluetooth and IR sensor
Packing List

Expansion plug ø8

Screw M6

Aluminum alloy bar

Required tools

Tape measure

Spirit level

Electric drill

Screwdriver

Hammer

Drill bit

Pencil

Note: Please carefully read the following before installing

Warning

1. Before installing the product, please carefully read the instructions and operate accordingly;
2. Before installing, please turn off the main power switch and ensure that it won't turn on;
3. The installation of this product requires that the staff has some electrical knowledge;
4. This mirror cabinet is heavy; do not lift or install with single person in order to avoid injury;
5. Before installing, please check whether the product is broken, to avoid injury caused by damaged glass;
6. Do not clean the product surface with acid and alkaline cleaning agent; please use a damp cloth.
7. If the cabinet door is broken and replacement needed, have to unplug the spring coil from cabinet firstly.

3.3 If the cabinet door isn't flat (Fig. 10), adjust the distance between the door and the cabinet by adjusting the screw (c) to make the door flat. (Fig.11)

⚠ Warning: The distance between the door and the cabinet should not be too small, otherwise the door can't be opened and may lead to the door rupture.

Fig. 10

Rotate CW: Distance between door and cabinet reduces
Rotate CCW: Distance between door and cabinet increases

Fig. 11

3. Mirror Door Adjustment

3.1 Fix the mirror cabinet, and check if the mirror door is flat; if not (as shown in Fig. 8), adjust the distance of the door opening by adjusting the hinge screw (b) and keep both doors level (Fig. 9).

1. Fixing the bar

1.1 Open the product packaging, and check whether the product has any exception or functional damage; if yes, please return it to the dealer.

1.2 After selecting the location of the mirror cabinet, check whether the wall is solid, measure the distance of the holes (A, A-1) in the aluminum alloy bar with a tape measure and mark it on the wall with a pencil (Fig. 1).

1.3 Drill holes in the marked position with electric drill and ø8 drill bit, and use special ceramic drill if the wall surface is ceramic tile.

1.4 Knock the expansion plugs into the holes in the wall with a hammer, and then tighten the screws with a screwdriver to fix the bar, and calibrate the level with a spirit level (Fig. 2).

2. Positioning and Installation of Mirror Cabinet:

2.1 Attach the mirror cabinet to the bar as shown in Fig. 3, open the cabinet door, and mark on the wall with a pencil (Fig. 4) through the backplane hole (a).

2.2 Remove the mirror cabinet, drill the fixing hole in the wall in the marked position, and place the expansion plugs (Fig. 5).

2.3 Repeat the operation as shown in Fig. 3 and mount the mirror cabinet to the bar, make sure that the circuit on the wall is not energized and connect the three-core wire reserved on the wall to the three-core wire terminal block on the product (Fig. 6), and then tighten the screws on the backplane.

2.4 Finally, turn on the main switch, and test if the switch works normally (Fig. 7).

2.5 Turn on the light, after heard the ring, it means connect the Bluetooth, use the cell phone to search "Mirror-BT" and connect it.

2.6 Everytime restart the Bluetooth, please wait 30 seconds.
